Glens Falls Hospital Earns National Recognition for Stroke Treatment

The American Heart Association Presents Get With The Guidelines–Stroke Gold Plus with Target Diabetes and Target Stroke Elite Honor Rolls

Glens Falls Hospital has received the American Heart Association's Gold Plus Get With The Guidelines®–Stroke Quality Achievement Award for their commitment to ensuring stroke patients receive the most appropriate treatment according to nationally recognized, research-based guidelines.

Stroke is the No. 5 cause of death and a leading cause of adult disability in the U.S. On average, someone in the U.S. suffers a stroke every 40 seconds, and nearly 795,000 people suffer a new or recurrent stroke each year. Early stroke detection and treatment are key to improving survival, minimizing disability, and speeding recovery times.

Get With The Guidelines–Stroke was developed to assist healthcare professionals to provide the most up-to-date, research-based guidelines for treating stroke patients.

"Glens Falls Hospital is honored to be recognized by the American Heart Association for our dedication to helping our patients have the best possible chance of survival and after a stroke," said Cassandra Moore, Neurology Service Line Administrator and Director of the Stroke Program. "Get With The Guidelines–Stroke makes it easier for our teams to put proven knowledge and guidelines to work on a daily basis to improve outcomes for stroke patients."
