Adirondack Health Institute

Hepatitis C (HCV, Hep C), HIV, and Sexually Transmitted Infection (STI/STD) Testing and Treatment Providers: Regional Resource Guide

Clinton, Essex, Franklin, Fulton, Hamilton, Montgomery, Saratoga, St. Lawrence, Warren, and Washington Counties

Prepared by:

AHI's Rural Communities Opioid Response Program (RCORP)

HCV, HIV, and STI/STD Testing and Treatment Providers in Northeastern New York

This resource guide includes hepatitis C (HCV), HIV, and STI/STD testing and treatment providers located within or adjacent to AHI's Rural Communities Opioid Response Program (RCORP) Implementation Grant service area, including Clinton, Essex, Franklin, Fulton, Hamilton, Montgomery, Saratoga, St. Lawrence, Warren, and Washington Counties. We have also included Albany Medical Center, located in Albany County, because it is the region's New York State-designated AIDS Treatment Center, providing medical, social, nutritional, psychological, educational and clinical research services to hospitalized HIV/AIDS patients and outpatients regardless of their ability to pay. For that reason, it may be the most accessible provider for some individuals from the RCORP service area.

Service providers on this list are open to all individuals in any county or, as noted, to all residents of a specific county. Individuals do not need to have a referral from a primary care provider to access services, and it is not necessary for an individual to be an established patient at any of the locations. We have not included agencies or facilities that require referral by a healthcare provider or that limit services only to established patients.

Providers are listed in alphabetical order by agency name. Please consult each agency's website (or phone contact if website is not available) for additional and specific information about the services provided, hours, cost, and how to access services. **Free testing is available at some locations**.

Note: Underlining indicates a hyperlink to an agency/organization website or a link to email.
